

profiles for resilient and vinyl floors

Terminal edges and nosing profile trims for coverings in PVC, linoleum or other thin material coverings, with 2 ÷ 3 mm thickness, just like the needle-punched pressed rugs. These profiles ensure a clean and neat finish with a slight extra height adding and hide cutting imperfections.

Illustrated scale dimension 1:1

FOLOLINO AP 17 AS* Anodised Aluminium Self-adhesive

Flat level terminal trim slightly rounded and self-adhesive for mismatching 2 ÷ 3 mm floors. Profile developed in Silver anodised aluminium which is well suited for domestic environments and colour combinations. Also not self-adhesive.
