

anti-slip self-adhesive safety strip in rolls

folowalk™ SW

FOLOWALK SW Carborundum Self-adhesive Strip

The carborundum strips are made up of a highly compact plastic tape with aggregate granular abrasive polymer for long lasting performance. The adhesive bottom is protected by a paper liner.

FOLOWALK is tested for abt. 1,3 million walk over pedestrian transit. This endurance may be sensibly reduced if there is heavier wheel transit.

Safety along with long lasting performance Carborundum quality always stands out in accident prevention measures. **FOLOWALK** is a simply, ready to apply step safe adhesive strip which sticks to any surface. We recommend the double strip application per step in order to ensure a more effective safety action. Before the application of the strips, cut round the tips (see photo) and use a primer where necessary to ensure a better adhesion to the support. The safety strip should be used only on mirror-like surfaces.

INSTALLATION AND MAINTENANCE:

- 1) Thoroughly wipe off any residue, grease or dirt from the surface and apply primer if so necessary.
- 2) Round off the strip ends.
- 3) Remove the protective paper liner and apply the strip uniformly by press-roll.
- 4) Do not apply strips with temperatures below 15°C unless you have pre-heated the strips themselves and the support.
- 5) Regularly brush off impurities from strips so to maintain best grip texture.
- 6) For installation on smooth tiles, create small strips with rounded ends and apply them in each tile.
- 7) Seal the strips along the edges in order to avoid water infiltration under the strips with their consequent detachment.

Material: Carborundum
Widths: 19, 25, 50 mm

mm	Art.	Colour
19x18,2 m	SW 19 C51	Black
25x18,2 m	SW 25 C51	Black
